

# Rock, Paper, Scissors Project

Rock, Paper, Scissors is a simple game! Paper beats Rock, Scissors beat Paper, Rock beats Scissors, and if they are the same it's a draw. For this project, you will use HTML, CSS, and Javascript to make this game.

## Function

The game should go as such:

1. The first player will click their choice.
  - a. After they do so it will not show what move they did it will just show the next player or player 2 (however you would like)
2. The next player will choose their move.
  - a. After they select it will show both player's moves, it will display "X beats Y" and the scoreboard will give a point to player 1 or player 2
3. Then it will continue until you click the restart game button.

## Features

Your game should include:

- A scoreboard to keep count with Player 1 and 2 on respective sides
- Clickable features: Rock, Paper, Scissors symbols
- Do not show the first player move
- Restart button
- If you used a tutorial make the HTML and CSS original

The code must include the following:

- Conditionals
- Functions

**You may use a tutorial to complete this project.**
